ABOUT ME

- I am a software developer based in Western Australia. Experienced in a variety of programming languages and frameworks. I have several years experience developing software in small to medium agile development teams focused on delivering quality applications to my clients.

PROFESSIONAL EXPERIENCE

CODERS FOR CAUSES   **Perth, WA**

Volunteer, Full Stack Developer   **2021-2021**

- Coders for causes is a university club at the University of Western Australia that develops technical solutions for charities and non-profit organizations.
- Worked with the Western Australia Institute of Sport to develop a data management and analysis tool.
- Utilized Python Django REST framework to build API endpoints to serve data to a VueJS frontend application.
- Worked with a development team of 8+ members utilizing fundamental agile development practices.

INTERNATIONAL BUSINESS MACHINES (IBM)   **Perth, WA**

Application Developer Intern   **2021-2022**

- Worked with a small client facing agile team to deliver internal web based tooling using Angular
- Frequently participated in discussions with both the development team and client to identify and resolve technical requirements, issues and limitations.
- I quickly adapted to using Angular coming from the majority of my previous experience being limited to VueJS
- Satisfied client requirements whilst implementing various features and bug fixes.
- Shadowed senior team members to take on board as much knowledge and feedback as possible during my intern period.

INTERNATIONAL BUSINESS MACHINES (IBM)   **Perth, WA**

Application Developer Graduate   **2022-Present**

- Returned to working with IBM, maintaining my position at my original client.
- Transitioned to a smaller project team working on the optimisation and refactoring of older client systems.
- Utilized Python in Azure Databricks leveraging pandas, numpy and networkx to process large volumes of data.
- Able to meet the clients requirements despite a restrictive timeline and unfamiliar technologies.
- Continuing to work with IBM clients to develop solutions in a variety of environments.

EDUCATION

EDITH COWAN UNIVERSITY   **Perth, WA**

Bachelor of Computer Science, Major in Software Engineering   **2019-2021**

ADDITIONAL INFORMATION

- Experienced in frontend application frameworks including VueJS and Angular.
- Experienced in backend development using Python and Django REST framework.
- Ability to be flexible and adaptive in new and unfamiliar work environments.
- Desire to continuously learn and develop my skill set.
- Certifications: Azure Fundamentals AZ-900 (2022)
